

We have ammended our year end report. Previously the 3Z was including figures from a non federal election committee should have have been included for the calculation. We have fixed this problem with the software vendor.

This Form 99 is to clarify the totals reported on Form 3Z-1 for the period ending 12/31/2007.

The totals for Line 16, Column B and Form 3Z-1 line 3 should not match. As Line 16, Column B totals transactions by date range and the Form 3Z-1 totals transactions by election attribution, these line totals should be different.

\$1,000.00 in receipts were received in this election cycle but attributed to other cycles and thus are included in Line 16, Column B but not the Form 3Z-1.

\$1,490.00 in receipts were received prior to this election cycle but attributed to this cycles and thus are included on the Form 3Z-1 but not on Line 16, Column B.
